

MOLESafe USA /CONSENT FORM

Patient Consent for Medical Total Body Photography (TBP)

MoleSafe is not a replacement for physical evaluation. Molesafe's (TBP) when combined with a physical examination with your medical practitioner, provides comprehensive skin early detection & screening. Molesafe's TBP is a proactive full body mapping system that assists you and your medical provider in detecting precancerous lesions, melanoma and other skin cancers. Molesafe's technology and software, uses artificial intelligence and optimizes comparison of baseline photos to new or changing lesions in subsequent exams.

I am of legal age to execute this consent.

I agree to MoleSafe performing Total Body Photography.

MoleSafe is not a replacement for physical examination by your medical provider.

My Images will be transmitted and reviewed by a licensed dermatologist to provide recommendations for me to review with my medical provider via report.

The report issued by MoleSafe, is not a medical diagnostic report.

I authorize delivery of such a report, together with any images taken, to my medical provider/care team. It is my responsibility to seek the services of my medical provider for any follow up care and treatment that might be necessary.

I accept responsibility for seeking the services of a medical practitioner to conduct a physical examination of my skin and to perform such diagnostic tests as that practitioner deems appropriate.
